Press Release

Finding Location of Polling Stations on Google Map

In order to make it easy to find location of polling stations, the National Election Committee (NEC) has developed a program for managing and finding location of polling stations through online map and it is launched via website at www.pollingstation.org.kh on 13 July 2018 onward.

This program allows all stakeholders to find the location of polling stations on Cambodia's map which is installed on Google Map speedily via internet for serving for the Election of Members of the National Assembly in the 6th legislature 2018.

How to use the program: you can visit website at www.pollingstation.org.kh to find data by selecting commune/sangkat, municipality, district/khan and capital/province or find location through Google Map by clicking the icon of location of 25 Provincial/Capital Election Commissions.

According to the official result of Voter Lists and Voter Registration Update 2017 for the Election of Members of the National Assembly in the 6th legislature 2018, there are **8,380,217** persons having name in voter lists (www.ncelect.org.kh/khmer/content/2865). Citizens who have their name in voter lists 2017 can check their name and related data on website at www.voterlist.org.kh.
