OPEN CYBER TALK 2019

With the arrivals of Smartphones and Information and Communication Technology (ICT), social media has emerged as a media platform, where communication and information dissemination take place at the speed of light. The rise of social media, nonetheless, offers both opportunities and challenges. Speedy communication is vulnerable to critical risks of false information, hate speech, online sexual harassment, conspiracy and various forms of digital security. By taking these challenges into consideration, we are pleased to announce that we will hold our annual Open Cyber Talk 2019 under the theme “**Opportunities and Risks of the Netizens in Cambodia**” on March 17, 2019 at Tonle Basac II from 07:30 AM to 12:00 PM. The Open Cyber Talk 2019 is an important platform, where all social media users, activists, youth and women, experts, researchers, journalists and leaders of civil society organizations will meet together to discuss, learn and exchanges ideas and experience and find possible mechanisms to address the challenges they have encountered. The forum is open for the public. Since the Open Cyber Talk comes once a year, we would like to invite all active social media users, particularly women and youths to join.
